

Ecological paper tapes

Envelope and package tear tape is a thin strip of material that is used to facilitate opening. The tape is designed to tear along a straight line, allowing the envelope/carton to be opened cleanly and quickly. Tear tape is typically made from a thin, durable material such as polyester or polypropylene, and is coated with a strong adhesive on one side.

Our new ecological tear tape **EKOTEAR™** made from paper is an innovative solution that addresses the growing demand for sustainable and environmentally friendly packaging materials. This tear tape is designed to be a biodegradable and compostable alternative to traditional plastic tear tapes.

One of the key benefits of this new ecological tear tape is its sustainability. Unlike plastic tear tapes, which are difficult to recycle and often end up in landfills or oceans, paper tear tape is fully biodegradable and can be composted at the end of its life cycle.

Manufactured sizes*:

- 5 mm x 15000 m
- 6 mm x 12000 m
- 7 mm x 10000 m

Core diameter: **76 mm oraz 152 mm**

Core width: **180 mm oraz 300 mm**

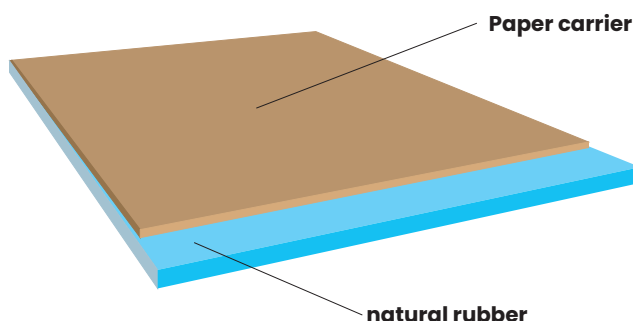

Maximum roll diameter: **450 mm**

*Other sizes possible in the range of 5 mm – 25 mm. Target roll length to be agreed.

Product specifications

Carrier: **Paper KRAFT Flatback**

Color: **brown**

Adhesive: **natural rubber, modified**

Total thickness: **0,19 mm**

Tear resistance: **180 N / 25 mm**

Breakeven / Stretchability: **>7%**

Adhesive strength: **>13 N / 25 mm**

Temperature resistance: **up to +90°C**

TAPE CERTIFIED ACCORDING
TO. STANDARD
CRADLE-TO-CRADLE

Certificate number: **5620**

Expiration date: **October 12, 2024 r.**
