

tesa® 60960

tesa® 60960 Anti-Scratch PET Floor Marking Tape: High Durability for Demanding Applications

Product description

tesa® 60960 is an advanced anti-scratch floor marking tape made from durable PET material, designed to withstand high levels of wear and tear in industrial, logistics, and warehouse environments. Its anti-scratch surface ensures long-lasting performance, even under heavy traffic, making it a reliable choice for permanent floor marking solutions. With its strong adhesive properties and exceptional resistance to abrasion and chemicals, tesa® 60960 ensures markings remain intact and visible over time. Available in a range of vibrant colors, it is ideal for enhancing safety, organization, and compliance in professional settings.

Key Features of tesa® 60960

- Anti-scratch PET surface for exceptional durability.
- Superior resistance to wear, chemicals, and cleaning agents.
- Strong adhesive for secure and long-lasting floor markings.
- Available in vibrant colors for enhanced visibility.
- Easy application with clean removal when required.

Technical Information (average values)

The values in this section should be considered representative or typical only and should not be used for specification purposes.

Product Construction

Backing material **PET film**

Total thickness **175 µm**

Type of adhesive **artificial rubber**

Properties/Performance Values

Elongation at break **140 %**

Tensile strength **175 N/cm**

Adhesion to Values

Adhesion to steel **4,5 N/cm**
