

Cross Reinforced Gummed Paper Tape

The Best Closure Solution for Secure Packaging

What is Cross Reinforced Gummed Paper Tape?

Cross Reinforced Gummed Paper Tape is a premium-grade **water-activated tape** designed for **demanding packaging applications**. Unlike conventional tapes, this tape **creates a permanent bond with the carton**, making it **tamper-evident** and **exceptionally strong**. The **fiberglass reinforcement** in both the **machine direction (MD)** and **cross direction (CD)** ensures superior durability, making it the most secure and sustainable closure solution.

Manufactured by **EKO-TECH**, our cross reinforced gummed tapes are produced with high-quality kraft paper and **synthetic starch-based adhesive**, making them **eco-friendly** and **100% recyclable**.

Why Choose Cross Reinforced Gummed Paper Tape?

Key Benefits

The Strongest Carton Sealing Solution

Bonds permanently with the carton to prevent unauthorized access.

Tamper-Evident

Once applied, the tape cannot be removed without visible damage, ensuring the package integrity.

Ideal for Heavy and Demanding Packaging

Used for two-strip sealing on top and bottom of cartons, perfect for secure shipments.

Works on Recycled and Non-Unitized Loads

Unlike standard tapes, it adheres even to challenging surfaces.

Eco-Friendly & Sustainable

Fully biodegradable and 100% recyclable with the carton.

Customizable Sizes & Printing

Available in standard widths of 50mm, 60mm, 70mm and lengths up to 150m, but also customizable for specific customer needs.

Branding & Identification

Custom printing up to 3 colors for branding, batch tracking, or security messages.

Cross Reinforced Gummed Paper Tape

The Best Closure Solution for Secure Packaging

EKO-TECH Cross Reinforced Gummed Paper Tape Variants

19800 Standard

- Light-Duty, Water-Activated Tape
- Reinforced with fiberglass (MD) and polyester (CD)
- Recommended for cartons up to 9 kg
- Works well on recycled cartons and non-unitized loads
- Thickness: 0.13mm
- MD Tensile Strength: >240N / 25mm
- CD Tensile Strength: >100N / 25mm

19801 Premium (Our Best Choice!)

- High-Performance Cross Reinforced Tape
- Reinforced with fiberglass in both MD & CD
- Superior tensile strength for heavy-weight packaging
- Recommended for heavier cartons (9kg and more)
- Thickness: 0.14mm
- MD Tensile Strength: >255N / 25mm
- CD Tensile Strength: >100N / 25mm

Applications of Cross Reinforced Gummed Paper Tape

Secure Case Sealing

Ideal for warehouse logistics & e-commerce.

Heavy-Duty Packaging

Used in industrial shipments and high-value goods.

Tamper-Proof Packaging

Provides visible evidence of tampering.

Branding & Identification

Fully printable for company logos, warnings, or marketing.

Cold Chain & Refrigerated Transport

Suitable for cold storage applications.

Automation & Packaging Machines

Compatible with automated dispensers.
