

Self-Adhesive Parts for automotive applications

Self-Adhesive Parts for automotive applications

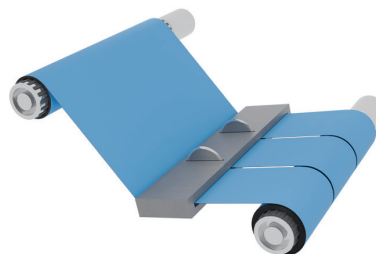

Advanced Converting Services

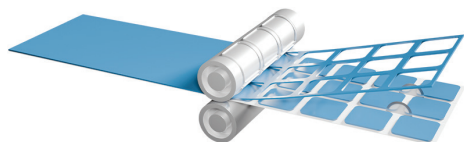

LAMINATION

Multi-layer constructions for added durability.

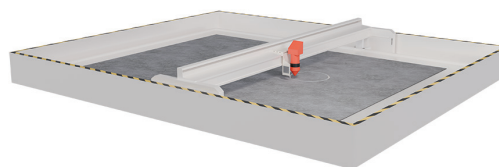

REWINDING & CUTTING

Custom roll & sheet sizes.

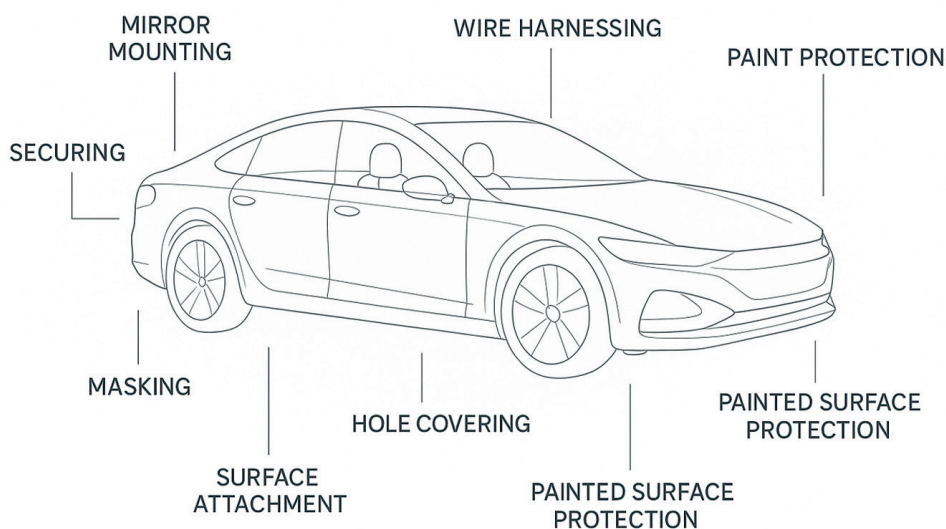

DIE-CUTTING & KISS CUTTING

High-precision shaping

LASER CUTTING

Clean, accurate edges with minimal waste.

Automotive Applications & Product Solutions – Strategic Partnerships which makes the difference.

TESA Tapes

Applications:

Used both during production and as part of the final assembly (e.g., mounting trim, securing lightweight components)

3M Tapes (e.g., VHB)

Applications

Bonding, sealing, and vibration damping—ideal for exterior panels, interior trim, and glass attachment.

Gottlieb Binder Fasteners

Applications:

Ideal for interior fastening solutions—providing secure, clean, and efficient mounting of interior panels and components.

Rogers High-Performance Gaskets

Applications:

Critical for sealing engine assemblies, transmissions, and HVAC systems, ensuring leak-proof performance under demanding conditions.

Felt Materials

Applications:

Employed for noise, vibration, and harshness (NVH) control, dampening, and buzz-squeak prevention in interior applications.

Robotape & Enimac Automation Solutions

Applications:

Enhance manufacturing efficiency through automation—improving the consistent application of tapes, gaskets, and fasteners while reducing manual errors.

Self-Adhesive Parts for automotive applications

Industry standards, certifications

INDUSTRY STANDARDS & COMPLIANCE

FIRE SAFETY

FMVSS 302 Certified – Meeting automotive interior flammability standards.

QUALITY & PROCESS CONTROL

IMDS Released – Approved for use in global automotive supply chains. PPAP, ISIR & FMEA Approved – Ensuring process consistency & risk management.

INDUSTRY MEMBERSHIPS

Engaged in leading automotive organizations.

CERTIFIED MANUFACTURING

ISO 9001:2015

Quality Management System

ISO 14001:2015

Environmental Responsibility
