

tesa® 54411

High-Performance Sealing Tape

Instant. Clean. Durable.

Seal Immediately, Protect Permanently!

tesa® 54411 is your instant solution for reliable, mess-free sealing of joints, seams, rivets, and fixings—even under the toughest environmental conditions. Experience the next level of sealing efficiency, durability, and ease of use.

Key Product Benefits:

- **Immediate, Mess-Free Sealing**
Instant bond without drying or curing time—no dripping or cleanup needed.
- **Highly Flexible & Conformable**
Easily adapts to complex surfaces, contours, rivets, bolts, and screws.
- **Superior Weather Resistance**
UV-resistant, waterproof, abrasion-resistant, withstands extreme temperatures.
- **Paintable & Professional Finish**
Seamlessly paint over for aesthetic integration into final products.
- **Environmentally Responsible**
Completely free from harmful PFAS substances.

Typical Applications:

- **Transportation:** Trucks, trailers, buses, rail vehicles
- **Construction:** Windows, doors, skylights, roofing, gutters
- **Industrial:** Plastic tanks, silos, containers
- **Maintenance & Repair:** Bolts, screws, rivets exposed to harsh environments

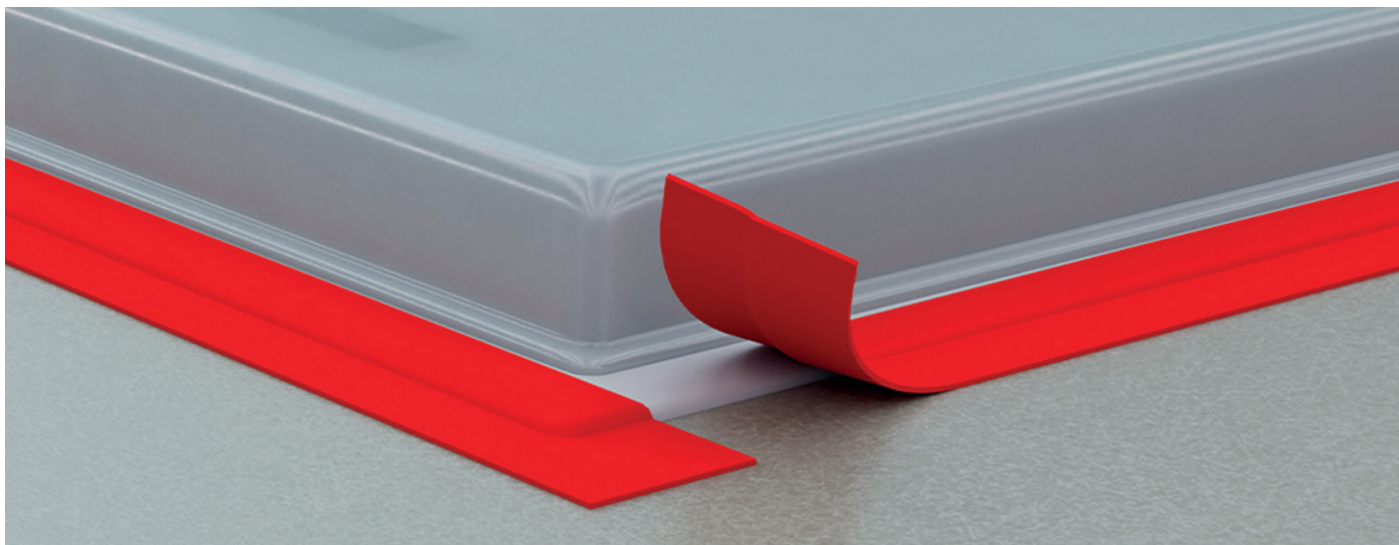

Why Choose Sealing Tape Over Traditional Solutions?

Traditional liquid or paste sealants can be messy, unreliable, and time-consuming. tesa® 5441I eliminates these problems by offering an instant, clean, and precise application, ensuring higher efficiency and reliability.

Compare the Advantages:

Benefit	tesa® 5441I Sealing Tape	Traditional Liquid Sealants
Immediate Sealing	✓	✗
Mess-Free Application	✓	✗
No Drying Time	✓	✗
Clean & Precise Finish	✓	✗
Easy Handling	✓	✗
Environmental Safety	✓	✗

Customized Solutions from EKO-TECH®

At EKO-TECH, we deliver tailored converting solutions perfectly matched to your specific needs:

- **Precision Cutting:** Tailored widths, lengths, and formats.
- **Die & Kiss Cutting:** Customized shapes for quicker and more accurate application.
- **Expert Technical Support:** Recommendations and assistance with application engineering.
- **Prototyping & Testing:** Rapid sample production and performance validation.
- **Logistics & Inventory Management:** Customized packaging and flexible delivery schedules (including Just-in-Time).
