

Tape & film dispensing solutions — engineered in Japan, supported in Europe.

Almost 20 years of cooperation delivering productivity-focused dispensing systems for Poland and Europe.

“The best dispenser is only as good as the tape preparation and process setup.”

EKO-TECH advantage:
We combine dispensing technology + tape converting know-how to deliver repeatable results.

YAESU Keikogyo is a Japanese manufacturer of automatic dispensers for **tape, label, and film**, with the ability to support **modification/customization** for specific needs.

For almost 20 years, **EKO-TECH** and **YAESU** have been developing dispensing solutions for customers across Poland and Europe — selecting the right machine, implementing it into real processes, and supporting projects long-term.

Two strengths **ONE SOLUTION**

YAESU Keikogyo (Japan) — engineering & product portfolio

- Founded **18 June 1965**
- Production and offering of **automatic tape dispensers**
- Portfolio includes **tape dispensers, label dispensers, film dispensers**, plus customized solutions
- Supports modification/customization depending on application

EKO-TECH — implementation power (“we know tapes”)

- We don’t only “sell a dispenser” — we help you **build a working dispensing process**
- Deep understanding of **tape behavior** (adhesive / backing / release liner / thickness / stiffness)
- Ability to **prepare the tape in the most effective form** to raise productivity (slit widths, rewound lengths, etc.)
- Project support across Europe: selection, trials, training, after-sales support

Customer benefits at a glance

Correct dispenser selection
for your tape & task

Faster, repeatable dispensing
→ higher productivity

Less tape waste & fewer
handling errors

Support for difficult
tapes/films

Tape prepared for the dispenser
(width/length/roll build optimized)

Europe-wide project support
with local partner

Tape & film dispensing solutions — engineered in Japan, supported in Europe.

Almost 20 years of cooperation delivering productivity-focused dispensing systems for Poland and Europe.

From tape roll to optimized dispensing process

Tape / film analysis

adhesive type, thickness, liner, cut length needs

Dispenser selection

Tape preparation (converting)

Implementation

cut length, feed speed, blade setup, accessories

Service & continuity

spare parts, training, repeat orders for prepared tape

Tape dispensers

Film dispensers

Label dispensers

What we can deliver

- The **right dispenser** for your tape width / cut length / needs
- A configured solution with accessories and application guidance (where needed)
- **Tape prepared for high efficiency** (slit to width, rewind)
- Implementation support for production / warehouse / clean workstations
- Long-term support (service approach aligned with YAESU support structure)
